

CENTRAL CORRIDOR

Central Corridor - Ushoroba wa Kati

Published: 19 June 2025

Regions Covered: Dodoma, Singida, Tabora, and Lake Zone regions (e.g., Mwanza, Shinyanga, Simiyu, Geita)

Strategic Role:

The Central Corridor serves as Tanzania's food basket for dryland farming systems, focusing on strategic crops and livestock suitable for semi-arid climates.

Priority Value Chains:

- **Sunflower** – oil production, local and export
- **Pulses** – especially pigeon peas, green gram
- **Livestock** – cattle, goats, and poultry
- **Cereal crops** – sorghum, millet, maize

Corridor Highlights:

- Development of drought-resilient technologies
- Feed production for livestock
- Strategic location linking all other corridors via Dodoma
- Agro-processing hubs for edible oils and meat
